

**Regulation 19  
Pre-Submission Draft  
Shropshire Local Plan  
2016 to 2038**

**Sustainability Appraisal and  
Site Assessment**

**Environmental Report**

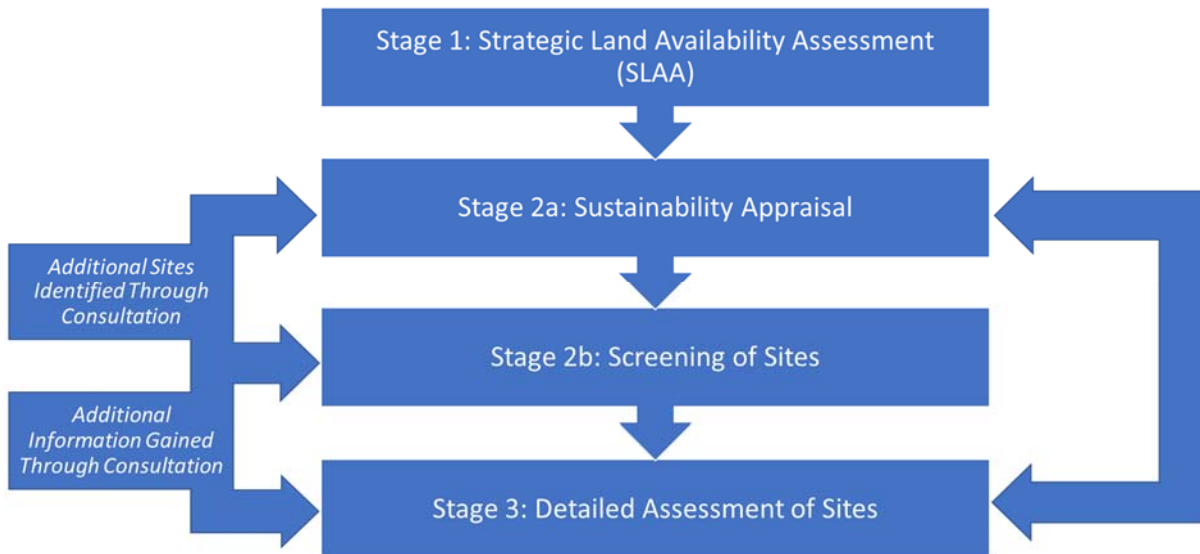

**Summary**

## Sustainability Appraisal and Site Assessment Summary

### Introduction

- 1.1 The Environmental Report explains the purpose of Sustainability Appraisal (SA) and shows how it fits in with the Strategic Environmental Assessment (SEA) process. The SEA process is similar to sustainability appraisal but has a narrower focus. It evaluates the effects that certain plans have on the environment whereas sustainability appraisal assesses the impact of plans on the environment, *plus* the economy and the community. SEA is required by a European Directive which has been translated into UK law by the Environmental Assessment of Plans and Programmes Regulations 2004. The government encourages Local Authorities to combine SEA and SA into one process.
- 1.2 Carrying out a SA offers provides an opportunity to:
  - consider how a plan contributes to improvements in environmental, social and economic conditions
  - identify any significant adverse effects that a plan might have
  - amend proposals in a plan to avoid any significant adverse effects
  - propose mitigation measures to counter any remaining significant adverse effects
- 1.3 In this way, SA can help make sure that plan proposals are the most appropriate given the reasonable alternatives.
- 1.4 The Environmental Report summarises the sustainability appraisal process which was undertaken for the various stages of the Shropshire Local Plan. It gives the results of the appraisals at each Plan stage and shows how SA has influenced the preparation of policies and the allocation of sites for development. Shropshire Council carried out the SA in-house alongside the preparation of, and consultation on, the Local Plan documents.
- 1.5 The Report also includes the results of the other assessments that were carried out as part of the site allocation process. These comprise:
  - Stage 2b - Filter of sites
  - Stage 3 - Detailed assessment.
- 1.6 The SA of sites forms stage 2a in this process. Stage 1 of the process, the Strategic Land Availability Assessment (SLAA) can be found <https://shropshire.gov.uk/planning-policy/monitoring-and-site-assessment/strategic-land-availability-assessment/> Stage 3 includes the reasoning in support of the choice of sites for allocation, taking into account all relevant factors, of which the SA is one. Note: sites with a poor SA rating may be proposed for allocation if the Council feels that on balance, other planning issues outweigh the SA score for that site. Whilst every effort has been made to avoid this, where it has proved necessary, mitigation measures which address the reasons for the site's poor score are proposed in the site guidelines.
- 1.7 The flow chart below (Diagram 1.1) summarises the site assessment process.

**Diagram 1.1: Relationship between the site assessment and site SA process**

**Site Assessment Process**

Stage 1: The Strategic Land Availability Assessment (SLAA)	Stage 1 consisted of a strategic screen and review of sites. Following the completion of the SLAA, further sites were promoted for consideration through the consultation and engagement process. Where possible these sites have been included within Stages 2a, 2b and 3 of the Sustainability Appraisal: Site Assessment process.
Stage 2a: Sustainability Appraisal	Following the completion of the SLAA, further information was achieved through the consultation and engagement process. Where possible this information has been considered within Stages 2a, 2b and 3 of the Sustainability Appraisal: Site Assessment process. Stage 2a consisted of the assessment of the performance of sites against the objectives identified within the Sustainability Appraisal.
Stage 2b: Screening of Sites	Stage 2b consisted of a screening exercise informed by consideration of a site's availability; size and whether there were obvious physical, heritage or environmental constraints present, based on the strategic assessment undertaken within the SLAA.
Stage 3: Detailed site review	Stage 3 consisted of a proportional and comprehensive assessment of sites informed by the Sustainability Appraisal and assessments undertaken by Highways; Heritage; Ecology; Trees; and Public Protection Officers; various technical studies, including a Landscape and Visual Sensitivity Study, Strategic Flood Risk Assessment and Green Belt Assessment/Review where appropriate; consideration of infrastructure requirements and opportunities; consideration of other strategic considerations; and professional judgement. This stage of assessment was an iterative process.

1.8 The process of developing a method for sustainability appraisal requires an understanding of the main social, environmental and economic characteristics of Shropshire. From these, the key issues that should be considered if new development is to take place can be determined. After this, the sustainability objectives (or questions used to assess the sustainability of the policies and the allocation of land for housing or employment uses) can be drawn up. They Key Issues and Sustainability Objectives (SO) are as follows:

### **The Key Sustainability Issues**

- Protect birds, habitats, plants, animals, designated sites, trees, woodlands, forests and biodiversity
- Recognise the value of the natural environment
- Restore biodiversity
- Enhance access to the countryside
- Enhance the natural environment
- Promote sustainable modes of transport, particularly cycling and walking
- Combat poverty
- Reduce inequalities and improve safe access to services
- Provide a wide range of good quality housing to meet the diverse needs of the community
- Encourage a strong and diverse economy
- Reduce inequalities and the number of people living in fuel poverty
- Reduce all forms of pollution
- Use the natural environment to deliver mental and physical health benefits and encourage community participation in activities that promote wellbeing
- Increase physical activity levels
- Conserve and enhance soil resources
- Protect the best and most versatile land
- Reduce water pollution levels
- Reduce flood risk
- Reduce water consumption
- Protect and enhance water quality and the condition of water resources
- Conserve and enhance air quality
- Reduce air pollution levels
- Protect people and the natural environment from air pollution
- Reduce greenhouse gas and carbon emissions
- Reduce climate change
- Promote mitigation and adaptation to climate change
- Reduce energy consumption, promote energy efficiency and increase the amount of energy from renewable sources
- Protect and conserve natural resources
- Promote better management and efficient and sustainable use of natural resources
- Reduce both the amount of waste generated and the amount sent to landfill
- Increase the re-use and recycling of materials
- Protect designated and non-designated heritage assets
- Conserve and enhance the historic environment
- Conserve and enhance landscape character
- Promote the conservation and enhancement of AONBs and other designated landscapes
- Promote landscape management

### **Sustainability Objectives**

- SO1** Protect and enhance the range of plants and animals in Shropshire and the quality and extent of wildlife habitats
- SO2** Encourage a strong and sustainable economy throughout Shropshire
- SO3** Provide a sufficient amount of good quality housing which meets the needs of all sections of society.
- SO4** Promote access to services for all sections of society
- SO5** Encourage the use of sustainable means of transport
- SO6** Reduce the need of people to travel by car

- SO7** Support active and healthy communities.
- SO8** Protect and improve soil quality
- SO9** Conserve and enhance water quality in Shropshire and reduce the risk of water pollution.
- SO10** Reduce flood risk and improve flood management
- SO11** Conserve and enhance Shropshire's air quality and reduce the risk of air pollution
- SO12** Reduce carbon dioxide emissions
- SO13** Promote adaptation and mitigation to climate change
- SO14** Promote efficient use of natural resources
- SO15** Conserve and enhance features and areas of heritage value and their setting
- SO16** Conserve and enhance landscape character and local distinctiveness

### **Stages of the Local Plan preparation process**

1.9 The Local Plan has been prepared in several stages:

- **Issues and Options:** options for the number of houses, amount of employment land and how both should be distributed in the Shropshire.
- **Preferred Options Scale and Distribution of Development:** proposed number of houses and amount of employment land in the county and the settlements where this could be allocated, plus an outline of how development could take place in the rural area (Community Hubs and Clusters)
- **Preferred Sites:** proposed sites for housing and employment uses
- **Strategic Sites:** consideration of larger (more than 25ha) sites which could be allocated for housing and/or employment.
- **Regulation 19 Pre-Submission Draft Local Plan:** development management policies and allocated sites for housing and employment, including strategic sites/settlements
- **Regulation 19 Pre-Submission Draft Local Plan:** development management policies and allocated sites for housing and employment, including strategic sites/settlements

1.10 The Sustainability Objectives have been used to assess all documents published as part of the preparation of the Local Plan.

### **How the SA influenced the consideration of alternative policy options**

1.11 Table 1.1 below shows the evolution of the policies through the stages of the Plan and the significant positive and negative effects on the Sustainability Objectives.

Regulation 19 Pre-Submission Draft Plan  
Sustainability Appraisal and Site Assessment Environmental Report Summary

**How the SA influenced the consideration of alternative sites.**

1.12 Tables 1.2, 1.3, 1.4 and 1.5 below show which sites were considered for allocation during the Local Plan preparation process and the outcome of the site Sustainability Appraisal process. Sites shown in bold and highlighted in grey are those that performed poorly in the Sustainability Appraisal.

**Table 1.2 How significant effects identified by the SA have influenced housing site allocations**

**What the sustainability appraisal process has contributed**

- 1.13 The sustainability appraisal process has been integral to the preparation of the Local Plan. It has evaluated the likely significant environmental, economic and social impacts of the policies and the site allocations throughout each stage of the development of the Plan:
  
- 1.14 The Issues and Options Local Plan document was subject to SA as it was prepared, and the results were used in the development of the options. The SA for the Issues and Options document was available for public inspection at the same time as the Issues and Options document itself. There were four consultation responses about the Sustainability Appraisal. No changes were made to the SA. A summary of all the

Regulation 19 Pre-Submission Draft Plan  
Sustainability Appraisal and Site Assessment Environmental Report Summary

representations made on the Local Plan consultation document, including those on the SA is available on Shropshire Council's website

- 1.15 The Preferred Scale and Distribution of Development plan document was subject to SA as it was prepared, and the results presented in a SA Report. This was available for public inspection at the same time as the Issues and Options document itself. There was one consultation response about the Sustainability Appraisal Report, but no changes were made to the SA. A summary of all the representations made on the LPR Preferred Scale and Distribution of Development document, including those on the SA, is available on the Council's website.
- 1.16 SA was carried out on the Preferred Sites plan document and the Strategic Sites Plan documents as they were prepared. The SA for each document was available for public inspection at the same time as the documents themselves. Comments made on these reports were used to amend the SA for the Regulation 18 Pre-Submission Draft Local Plan so that it included a criterion on the distance of a site to a bus stop or train station with a regular peak hour service. A summary of all the representations made on the LPR Regulation 18 Pre-Submission Draft Local Plan, including those on the SA, is available at <https://shropshire.gov.uk/media/16698/summary-of-responses-to-the-consultation-on-the-regulation-18-pre-submission-draft-of-the-shropshire-local-plan.pdf> These comments have been used to further refine the SA for the Regulation 19 Pre-Submission Draft Local Plan.
- 1.17 The effects of the Local Plan will be monitored using the indicators set out in the Sustainability Appraisal Scoping Report. These will be published in the Authority Monitoring Report (AMR).
