Attention Deficit Hyperactivity Disorder (ADHD)

The information contained within this pack was correct at the time of sharing. We update this on a regular basis. If you notice any links are broken or information has changed please contact ShropshireFIS@shropshire.gov.uk and we will update the information. Further Family Information Services and Resource Packs are available through the Early Help website www.shropshire.gov.uk/early-help

July 2015
ADHD

Attention deficit hyperactivity disorder (ADHD) is a common condition that mainly affects behaviour. It is usually diagnosed in children but can affect adults. Symptoms include persistent restlessness, impulsiveness and/or inattention. The diagnosis is made after a detailed assessment by a healthcare professional.

- The prevalence of ADHD is estimated to be around 2.4% of children in the UK.
- ADHD is most often diagnosed in children aged 3-7 years, but it may not be recognised until later in life and sometimes not until adulthood.
- ADHD is more commonly diagnosed in boys than in girls.

Comorbidity

• Young people and adults with ADHD may have associated problems - e.g., self-harm, a predisposition to road traffic (and other) accidents, substance misuse, delinquency, anxiety states and academic underachievement.

• ADHD is a part of a spectrum of disorders. 70% also have other conditions such as generalised or specific learning difficulties (e.g., dyslexia, language disorders, autistic spectrum disorder, dyspraxia, Gilles de la Tourette's syndrome or tic disorder).

• Oppositional defiant disorder or conduct disorder is present in most children with ADHD; other associated disorders include mood disorder, anxiety disorder and specific developmental disorders such as dyslexia or dyspraxia.

“Everybody is a genius. But if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid.”
~Albert Einstein
**Diagnosis and Management**

**NICE (National Institute for Health and Care Excellence)**

Guidelines for ADHD

This guideline makes recommendations for the diagnosis and management of attention deficit hyperactivity disorder (ADHD) in children, young people and adults. The guideline does not cover the management of ADHD in children younger than 3 years. The term 'children' refers to those aged 11 years and younger; 'young people' refers to those between 12 and 18 years.

**PatientPlus**

PatientPlus articles are written by UK doctors and are based on research evidence, UK and European Guidelines. They are designed for health professionals to use, so you may find the language more technical than the condition leaflets but it is really informative and follows the process right from the beginning and heavily endorses parenting programmes and strategies to help support children with pre and post diagnosis ADHD

Support Tools for children, parents and carers

Living with ADHD
This website has been developed to support those whose lives are affected by Attention Deficit Hyperactivity Disorder (ADHD) - parents/carers and teachers - and also provides resources for children and teenagers themselves, to help them understand and manage the condition.

This site offers key information, downloadable tools, hints and tips, and useful contact points. It has a sections for teenagers, children and parents and carers.
http://www.livingwithadhd.co.uk/

NHS Choices
This website gives an overview of all spectrum disorders but this page in particular gives some advice on supporting positive behaviour
http://www.nhs.uk/Conditions/Attention-deficit-hyperactivity-disorder/Pages/LivingwithADHDpage.aspx

ADHD Partnership
The material contained within this programme has been developed in collaboration with ADHD-Europe and an expert European ADHD Awareness Taskforce. Their range of professional expertise ensures the material has been developed for parents and teachers by their peers, with practical advice based on each taskforce member’s wealth of experience.

This is a really useful tool and gives a really crammed full of information that parents, carers and professionals will find useful.

ADDERS - ADDers.org ADD/ADHD Online Information

Our objective is to promote awareness to Attention Deficit/Hyperactivity Disorder and to provide information and as much free practical help as we can to sufferers, both adults and children, and their families in the UK and around the World via this website.

http://www.adders.org/

The Hyperactive Children’s Support Group

The Hyperactive Children's Support Group (HACSG) is a registered charity which has been successfully helping attention deficit hyperactivity disorder (ADHD) and hyperactive children and their families for over 35 years. Their specialism is advocating a dietary approach to the problem of hyperactivity and they have a great deal of information available related to food additives, food intolerance, omega fatty acids, vitamins & minerals and how they can impact on hyperactivity and ADHD

71 Whyke Lane, Chichester, West Sussex, PO19 7PD
For those people wishing to test out the theory that certain foods can affect and even help to modify behaviours there is a link to a food diary and online support above

AADD-UK – The site for and by adults with ADHD
The main aims of AADD-UK are raising awareness of ADHD in adulthood, advancing the education of professionals and the public at a national and local level in the UK to ensure that all adults with ADHD regardless of age, health, ethnicity, socio-economic status, and religion have fair and equitable access to health, social, employment, and other services as needed, and to promote and support research in the field of adult ADHD.
http://aadduk.org/

ADDISS (Attention Deficit Disorder Information and Support Service)
ADDISS is a registered charity providing information, training and support for parents, sufferers and professionals in the fields of ADHD and related learning and behavioural difficulties.

They support a multi-disciplinary assessment and treatment protocol, including education and behavioural interventions, with or without medication, always keeping an open mind and trying to help families find their own, most appropriate approach to intervention.

Premier House, 112 Station Road, Edgware, HA8 7BJ
Tel: 020 8952 2800

9. 1, 2, 3 Magic by Thomas Phelan

10. Taking Charge of ADHD by Russell Barkley

Tools and education for Children

Calvin and Hobbes

Calvin is a 6 year old boy who is in trouble all the time. He often blames Hobbes for this and even though Hobbes is his toy tiger, he is very real to Calvin. Together they take part in stories and adventures that children with ADHD can identify with.
